Objective

Fourth-year Computer Science student building responsive websites and ML-enabled applications. Experienced in delivering production-ready UI using modern tools and AI-assisted workflows. Currently developing LeafSense, a live plant leaf health detection system combining React, Flask, and PyTorch for real-time plant image diagnosis.

Experience

- Bioresearch Community** Bangalore / Remote
Frontend Developer Intern Sep 2025 – Present
 - Contributed to company platforms **IGT (College Website)** and **ProLearn (Learning Portal)** using React.js, TypeScript and Tailwind CSS.
 - Developed reusable UI components, integrated REST APIs for dashboards and learning modules, and improved component performance.
 - Delivered responsive UI pages and multi-page layouts with emphasis on usability and fast load times.
 - Collaborated with backend and design teams using Agile practices, ensuring accessible and consistent UI.
- Zidio Development** Bengaluru / Remote
Full Stack Development Intern Jun 2025 – Sep 2025
 - Built front- and back-end modules using HTML, CSS, JavaScript and Node.js; implemented API integrations and deployment basics.
 - Improved frontend architecture for maintainability and created modular components.
 - Participated in code reviews and QA workflows to support stable delivery.
- AICTE Edunet Foundation (with IBM SkillsBuild)** Remote
Front-End Web Development Intern Aug 2025 – Sep 2025
 - Completed government-backed front-end training; implemented responsive layouts in HTML5, CSS3 and JavaScript.
 - Gained practical experience with version control, modern workflows, and UI best practices.
- SmartBridge (Google Cloud) - Virtual Internship** Remote
Generative AI (Virtual) Jul 2025 – Sep 2025
 - Completed a virtual internship on Generative AI using Google Cloud and Vertex AI concepts.
 - Explored prompt design, model workflows, and cloud-based deployment strategies.

Education

- IILM University, Greater Noida** Expected 2026
B.Tech in Computer Science 2022 – 2026

Projects

- LeafSense Plant Leaf Health Detector** React, TypeScript, Flask, PyTorch, timm, Tailwind
Major academic ML project for live plant leaf image diagnosis
 - Collaborated with team members to design and build a live web application classifying plant leaf images as Healthy or Diseased using a LeafSense binary dataset derived from PlantVillage.
 - Constructed dataset preprocessing to map folders with “healthy” to Healthy and symptomatic folders (early_blight, rust, etc.) to Diseased.
 - Trained EfficientNet-B0 in PyTorch/timm and added a secondary ImageNet-based plant/leaf filter to reject non-plant uploads.
 - Added Test-Time Augmentation (TTA) and a 50% confidence threshold for stable, actionable predictions.
 - Created a React + Vite frontend and Flask REST API backend with Pillow / torchvision preprocessing and structured JSON inference output.
- AgriDoctor Magazine Website** HTML, CSS, JavaScript / CMS
Content-driven web platform [Live Site](#)
 - Built and maintained a content-heavy website with a structured layout and clean UI.

- Optimized pages for fast loading and consistent performance across devices.
- Ensured responsive design and smooth user experience for article browsing.
- **ProLearn – Expert-Led Learning Platform** React, TypeScript, Vite, Tailwind CSS
Modern e-learning platform with structured course catalog [Live Site](#)
 - Built a scalable React 18 + TypeScript frontend using Vite for optimized performance.
 - Developed responsive multi-page UI with structured layouts and polished navigation.
 - Focused on performance optimization and real-world usability across devices.
- **IGT – Institute Website (React)** React, TypeScript, Vite
Responsive educational institution website [Live Site](#)
 - Built a complete multi-page responsive website showcasing programs and departments.
 - Used reusable components and structured page layouts for consistency and scalability.
 - Optimized performance and ensured smooth user experience across devices.
- **Personal Portfolio Website** HTML, CSS, JavaScript
Developer portfolio showcasing projects and skills [Live Site](#)
 - Built a fully responsive portfolio website with clean UI and structured navigation.
 - Optimized for fast loading and smooth performance across devices.
 - Implemented state management and prepared scalable integration for backend APIs.

Skills

- **Programming Languages:** HTML5, CSS3, JavaScript (ES6+), TypeScript, Java, Python
- **Frameworks / Libraries:** React.js, Tailwind CSS, Redux Toolkit, Next.js, Flask, PyTorch
- **Tools & Platforms:** Git, GitHub, VS Code, Vercel, Render
- **Concepts:** Responsive Design, REST APIs, Machine Learning, Image Classification, UI/UX Fundamentals

Certifications & Achievements

- **AICTE + IBM SkillsBuild** Front-End Web Development - Certificate of Completion Sep 2025
- **Google Cloud Generative AI (SmartBridge)** Virtual Internship Completion Sep 2025
- **Zidio Development** Full Stack Internship Certificate Oct 2025
- **NCC 'B'** Certificate (Leadership) Sep 2020

Volunteer & Extracurricular

- **NCC Activities** Sep 2020
National Cadet Corps
 - Completed NCC "B" Certificate training; developed discipline and leadership.
 - Participated in campus-level drills and social service events.
- **Event Coordinator** 2025
IILM University
 - Managed the Job Fair event at IILM University, coordinating students, faculty, and visitors.
 - Oversaw scheduling, registration, and on-day logistics for smooth execution.

Additional Information

Languages: English (Professional), Hindi (Native).

Interests: Travelling, Gaming.
